

Directional antenna **S12/1900-2170**
for use in **3G/UMTS** networks

Directional outdoor antenna for the 3G/HSDPA signal range.

Resulting in more stable signal a high gain antenna will provide you with higher data rates as your signal to noise ratio is increased, thus a better transfer rate can be achieved.

Material: gold anodized aluminum.
Length 54cm
Connection: short low-loss cable with N female connector (other on request).
Mast mounting clamp for mast 25-60mm, with horizontal/vertical installation and zenithal adjustment.
